

Setting Up Jenkins Pipeline to Deploy Docker Swarm.

DESCRIPTION

Git hub link : <https://github.com/moulaalihujare/Simplilearn-Phase-5-Projects.git>

Project objective:

To develop an environment for Docker networking.

You must use the following:

- Jenkins: To create a pipeline to deploy Docker Swarm
- Docker Swarm: To implement container networking
- Git: To connect and push files from the local system to GitHub
- GitHub: To store the Angular application

Following requirements should be met:

- A few of the source code should be tracked on GitHub repositories. You need to document the tracked files that are ignored during the final push to the GitHub repository.
- Submission of your GitHub repository link is mandatory. In order to track your task, you need to share the link of the repository in the document.
- The step-by-step process involved in completing this task should be documented.
