

Automate the Web Application.

DESCRIPTION

Git hub link: <https://github.com/moulaalihujare/Simplilearn-Phase-5-Projects.git>

Project objective:

Use the website link given to you and automate different functionalities for the same. Create a new project and include all the dependencies in the class path. Create a Java class that will contain your automation and test scripts. Run the project using TestNG.

You must use the following:

- Eclipse as the IDE
- TestNG
- Selenium WebDriver

Following requirements should be met:

- Show a registration form, login, search bar, and add-to-cart automation
- Handle invalid logins and show appropriate error messages in the console
- Fetch the test reports over HTML or Excel
- Document the step-by-step process involved in completing this task
